Introduction

These instructions contain important information to ensure safe operation of your 500 Warm White Light Chain LED Lights.

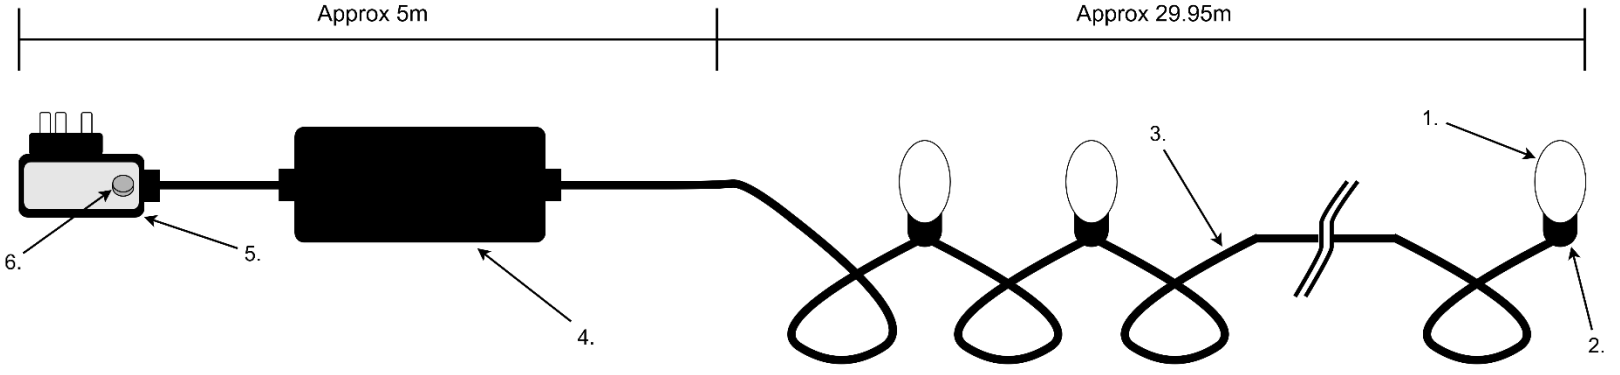

Your new light chain can be used to brighten up your home or patio with eight varied lighting settings and a built-in memory function.

The 5m insulated power cable will allow you to illuminate your covered outdoor spaces when plugged into an indoor mains socket.

Please read the following safety information and instructions to prevent damage to the unit and the possibility of injury.

Keep this booklet in a safe location to refer to later.

Set contents

1. 500 x **non-replaceable** long-life LED bulbs
2. LED bulb seal gaskets
3. Weather-resistant insulated cable
4. Transformer
5. All-in-one control unit and power supply
6. Control button

⚠ CAUTION: Each of the listed components is non-replaceable. Do not attempt to remove or replace the LED bulbs or any other part of the device. Dispose of the device at an authorised household electrical waste facility if any part is missing or damaged.

Safety information

⚠ WARNING	DO NOT CONNECT THE LIGHT CHAIN DIRECTLY TO THE MAINS. ALWAYS USE THE PROVIDED POWER SUPPLY AND TRANSFORMER.
⚠ WARNING	DO NOT ALLOW THE LIGHTS TO STAND IN WATER OR PLACE IN A POSITION WHERE WATER IS LIKELY TO POOL.
⚠ WARNING	DO NOT CONNECT THIS DEVICE TO ANY OTHER LIGHT CHAIN.

⚠ CAUTION	Do not plug the power supply in outdoors; the device must always be plugged into an indoor mains socket.
⚠ CAUTION	Do not expose the device directly to heat or flame.
⚠ CAUTION	Do not power the device before ensuring that all packaging has been removed.
⚠ CAUTION	Do not operate the device if the power cable or insulated wiring has been damaged. This device must be disposed of at a household electrical waste facility if damaged.
⚠ CAUTION	Do not remove or replace the LED bulbs.
⚠ CAUTION	Do not use the device if any LED bulb seal gasket is missing or damaged.

Note	It is normal for the transformer to become warm during use.
Note	This device is suitable for indoor and outdoor use provided that the light chain is not exposed to pooled water or direct heat.

Instructions

Directions for use

1. Inspect the unit for damage to the power cable or other components before installing.
2. Install the LED light chain either indoors or at a covered outdoor location.
3. Plug the power supply into an **indoor mains socket** to turn the LED light chain on.
4. Press the control button on the power supply to change the control function to the desired effect.
5. Unplug the power supply from the mains socket when not in use.

⚠CAUTION: Do not use the LED light chain if the cable insulation is damaged, or if the bulb or gasket of any LED light is missing.

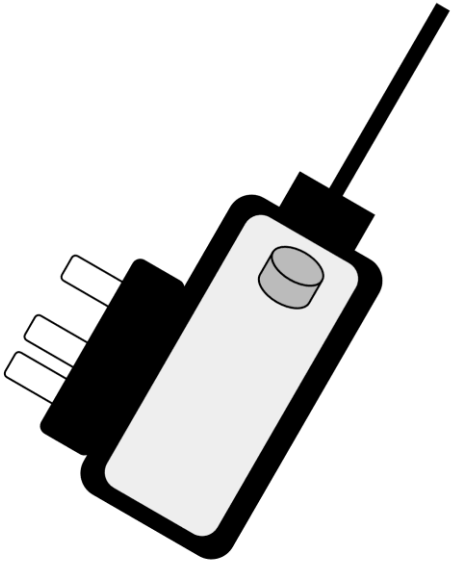

⚠WARNING: DO NOT PLACE THE UNIT IN A LOCATION THAT WILL ALLOW IT TO BE EXPOSED TO POOLED WATER.

Note: It is normal for the transformer to become warm during use.

Control functions

The unit has an eight-function controller with a memory function. Press the control button located on the power supply to select the desired effect. The unit will remember the selected setting when powered down, and the lights will return to that setting when the power is switched back on. Press the control button to cycle the current function in the following order:

1. **Solid On:** Each LED will remain on constantly.
2. **Blinking:** Each LED will turn on for a brief period in sync.
3. **Flashing:** Each LED will turn on and off at regular intervals in sync.
4. **Twinkling:** Individual LEDs will turn on and off for brief intervals at random.
5. **Fade:** Each LED will slowly dim and brighten at regular intervals in sync.
6. **Wave:** Groups of LEDs will alternately turn on and off in a rippling pattern.
7. **Pulse:** Every other LED will alternately turn on and off at regular intervals.
8. **Random:** Each function will activate at random for a varied experience.

a. All-in-one power supply and control panel

Specifications of electrical components

Bulb rating:	3V/0.06W
Transformer:	IP20 31V/6W
Set rating:	31V/3.6W

Regulatory and compliance information

Protection class III: Low voltage protection.

Certified for sale in Great Britain.

Certified for sale in the European Union.

Level 4 protection against solid objects; level 4 protection against water.

Do not dispose of in general household waste.

Produced in PRC. Imported by CDS Group.
